---

**SECTION 3 - SERVICE OFFERINGS****3.1 General**

The regulations set forth in this section govern the application of rates for services contained in other sections of this tariff.

**3.1.1 Application of Business and Residential Rates**

- A. The determination as to whether telephone service should be classified as Business or Residential is based on the character of the use to be made of the service. Service is classified as Business service where the use is primarily or substantially of a business, professional, institutional, or otherwise occupational nature. Where the business use, if any, is incidental and where the major use is of a personal or domestic nature at the person's dwelling, service is classified as Residential service.
- B. Business rates apply at the following locations, among others:
1. In offices, stores and factories, and in quarters occupied by clubs, lodges, fraternal societies, schools, colleges, libraries, hospitals, and other business establishments.
  2. In residence locations where the place of residence is in the immediate proximity to a place of business and it is evident that the telephone in the residence is or will be used for business purposes, and in residence locations where an extension is located at a place where business rates would apply.
  3. In the residence of a practicing physician, dentist, veterinary, surgeon, or other medical practitioner who has no service at business rates at another location.
  4. In any residence location where there is substantial business use of the service and the customer has no service at business rates.

---

**SECTION 3 - APPLICATION OF RATES, CONT=D.**

**3.1 General, Cont=d.**

**3.1.1 Application of Business and Residential Rates, Cont=d.**

C. Residence rates apply at the following locations, among others:

1. In private residences; in the residential portion of hotels, apartment houses, boarding houses, churches, or institutions when the use of the service is confined to the domestic use of the customer and listings of a business nature are not furnished.
2. In the residence of a practicing physician, dentist, veterinarian, surgeon, or other medical practitioner provided that such residence is not a part of an office building and provided the customer has service charged for at business rates another location.

**3.2 Charges Based on Duration of Use**

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- (A) Calls are measured in durational increments identified for each service. All calls that are fractions of a measurement increment are rounded-up to the next whole unit.
- (B) Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- (C) Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- (D) Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- (E) All times refer to local time.

**SECTION 3 - SERVICE OFFERINGS, CONT=D.**

**3.2 Charges Based on Duration of Use, Cont=d**

**SECTION 3 - SERVICE OFFERINGS, CONT=D.**

**3.3 Rates Based Upon Distance**

Where charges for a service are specified based upon distance, the following rules apply:

- 3.3.1** Distance between two points is measured as airline distance between the Rate Centers of the originating and terminating telephone lines. The Rate Center is a set of geographic coordinates, as referenced in National Exchange Carrier Association, Inc. Tariff FCC No. 4, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven digit telephone number). Where there is no telephone number associated with an access line on the Company=s network (such as a dedicated 800 or WATS access line), the Company will apply the Rate Center of the Customer=s main billing telephone number.

**SECTION 3 - SERVICE OFFERINGS, CONT=D.**

**3.4 Calculation of Distance**

Usage charges are based on the airline distance between the serving wire centers associated with the originating and terminating points of the call. The serving wire centers of a call are determined by area code and exchange numbers. All calls are billed from the End User's serving wire center to the terminating point serving wire center.

The distance between the originating point and that of the destination point is calculated by using the "V" and "H" coordinates as defined by NECA Tariff FCC No. 4, in the following manner:

- Step 1: Obtain the "V" and "H" coordinates for the originating point and the destination point.
- Step 2: Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.
- Step 3: Square the differences obtained in Step 2.
- Step 4: Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5: Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6: Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers.

Formula: 
$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

**SECTION 3 - SERVICE OFFERINGS, CONT=D.**

Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. **SECTION 4 - RATES AND CHARGES, CONT=D.****4.12 Access Areas, Cont.****Classification of Exchanges By Access Areas**

Each exchange zone is classified into one of several Access Areas for the purposes of applying rates for basic local exchange telecommunications service.

<u>Access Area</u>	<u>Access Lines/Square Mile</u>
A	Over 3600
B	650 to 3600
C	Fewer than 650

The term “access lines” as used for access area grouping purposes refers to total network switched access lines, for both residence and business customers, including Centrex.

When the number of access lines per square mile of an exchange has either exceeded or fallen below the limits of its current access area for a period of 12 consecutive-months, the access area may be reclassified to the proper area upon due notice to the customers involved and the Michigan Public Service Commission.

Price differentiation between exchanges within an access area will be allowed within a range having the current price as the upper limit and the applicable statutory cost requirements of the density band as the lower limit. Rates can be decreased within this range on a one-day notice. This differentiation will be based on market factors on an exchange-by-exchange basis.

**SECTION 5 B SERVICE AREAS****5.1 Legal Descriptions and Maps**

The Company hereby mirrors the Map and Legal Description tariffs of the exchanges, by Incumbent Local Exchange Carrier, listed below to identify its service territory. Any future modifications to these exchange boundaries or legal descriptions of these boundaries will be automatically mirrored by the Company on a going forward basis. If not mirrored, new detailed maps and legal descriptions on an individual exchange basis will be filed with the MPSC for approval.
